

DIGITAL TRAINING CAMPUS GUIDE SILENCE

DIGITAL TRAINING SILENCE

TECHNICAL TRAINING COURSES

The objective of our technical training courses is to train all our specialists by offering them concepts and practical solutions related to their job.

We want our technicians to know our vehicles and work with them effectively and efficiently.

TECHNICAL TRAINING COURSES

AIMED AT

Professionals who want to be informed/updated in all processes of diagnosis, repair and maintenance of Silence vehicles.

OBJECTIVES

- Train all after-sales professionals in processes and technical skills.
- To make known the different means and tools available to improve their performance.

DESIGN

Content developed and taught by professionals specialized in the different areas involved in technical training.

TECHNICAL TRAINING COURSES

01

To access the platform, you must go to the following web page:
<https://webinar.Silence.eco>

02

In the upper right corner, you will find the word access, click there and then enter the access codes that we have sent you in the welcome email.

03

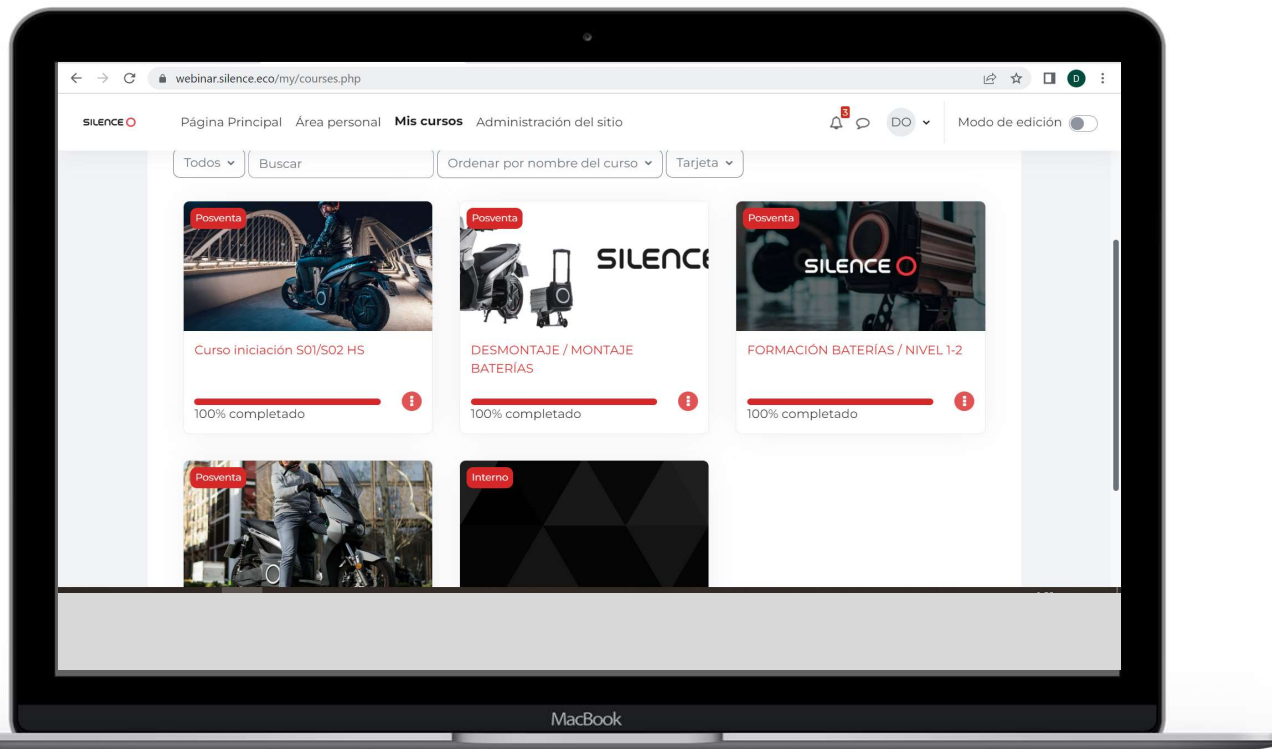

The first time you connect to the campus with the access codes, the system will ask you to set up a new password that you must remember as it will be the one you will use from now on to access your course.

TECHNICAL TRAINING COURSES

DASHBOARD

The Dashboard is your private area within the campus, where you will find the courses in which you are enrolled and the degree of completion of each one. There you will be able to organize your calendar, edit your profile, manage your private files and access the training courses. Remember that to access the private area at any time, you can do it through the quick menu at the top right.

TECHNICAL TRAINING COURSES

THE COURSES

In the section **My courses** you can see the available courses classified in the different areas or departments. To access any of them, just click on its description. In the lower center margin, you can see the percentage completed of each course in which you are enrolled.

TECHNICAL TRAINING COURSES

IN THE COURSES

When you start any course, you will be able to navigate sequentially through each of the slides, interacting with the vignettes and questions that we propose. You will also find courses structured in modules with videos, so it is important that you use headphones. Once you have visualized all the content, you will have to test yourself by taking a final evaluation.
